Shaping the Future of Dermatology

Our Invitation

The Dermatology Foundation is pleased to extend this invitation to attend the 2010 DF Clinical Symposia, to be held January 20-24 at The Ritz-Carlton in Naples, Florida. This peer-reviewed program is accredited for 16 AMA PRA Category 1 Credits™ and offers the latest authoritative and practical information presented by distinguished faculty. Net proceeds of the program will go to support dermatologic research.

Educational Objectives

- Improve diagnostic skills using dermoscopy for pigmented lesions
- Classify pediatric vascular malformations to improve diagnosis and treatment
- Quickly recognize and appropriately treat life-threatening dermatoses
- Describe an appropriate therapeutic ladder for the treatment of pediatric psoriasis
- Catalog new elements of workup and new treatments for cutaneous T-cell lymphoma
- Describe and explore uses of alternative (non surgical) treatments for skin cancers and pre-cancerous lesions
- List newly described skin toxicities of emerging targeted drugs, their relevance, and their management
- Describe new evidence regarding barrier repair, genetics, and immunology of eczema
- Analyze own techniques, strengths, and weaknesses in having difficult conversations with patients
- Describe evolving diagnostic workup and treatment standards for cutaneous lupus
- Explore alternative uses for botulinum toxins, including hyperhidrosis
- Distinguish between different filler agents and use them effectively and safely
- Analyze evolving evidence on neural innervation of the skin and its interaction with cutaneous inflammation
- Distinguish between the different biologic agents, their uses, and evolving information regarding their risks for patients with psoriasis and other skin diseases
- Critically analyze new evidence regarding vitamin D deficiency and its possible effects or non-effects
- Recognize applications of stem cell research to clinical dermatology
- Describe emerging infectious diseases of the skin and their implications for the future
- Effectively work up and treat patients with severe itching
